

- 🟡 17 TWh: Total heat demand in buildings (city & rural)
- 🟡 Heat Savings can cost-effectively reduce the demand by 40%
- 🟡 District heating can provide 40% of the heat demand vs 15% today
- 🟡 12 TWh: Potential Excess Heat Available (excluding nuclear)
- 🟡 13 TWh: Renewable Heat Potential in DH areas (excluding biomass)
- 🟡 Heat Strategies

## Can reduce:

- 🟢 Cost: -10%
- 🟢 Demand: -15%
- 🟢 CO2: -20%

## Can Increase:

- 🟢 Renewables
- 🟢 Jobs
